

Raven A. Reyes

AI SPECIALIST · AI AUTOMATIONS

Cavite, Philippines · +63 976 016 7954 · raven.reyes007@gmail.com

PROFESSIONAL SUMMARY

IT graduate transitioning into an AI Specialist / AI Automations role, building systems, websites, and automations with modern AI tools. Combines hands-on creative production and client-operations experience with practical use of ChatGPT, Gemini, and opencode to design and deliver working solutions. Recognized for high-quality output, fast problem resolution, and picking up new tools and systems quickly.

PROJECTS

Leadline — AI-Assisted CRM · Personal Project 2026

- Built and shipped a working CRM web app end to end: authentication, contacts, deal pipeline, and activity log.
- Added an AI quick-capture feature that turns a pasted message into a structured contact and deal, reviewed before saving.
- Added AI lead scoring and drafted follow-ups, called server-side so credentials never reach the browser.
- Applied row-level security so each user only reaches their own records; deployed to production on Vercel on free tiers.

Next.js · React · Supabase · Google Gemini · [leadline-topaz.vercel.app](#)

Luisa & Son — Cake Ordering System · Personal Project 2026

- Built and shipped a complete cake-ordering system: storefront, custom-cake builder, cart, checkout, order tracking, and a no-code admin panel.
- Engineered a server-authoritative pricing engine shared by the on-screen estimate and server checkout, so client tampering cannot change the total and every placed order stores frozen price snapshots.
- Designed a 13-table Postgres database with row-level security on every table and a security-definer admin gate; stored customer reference photos in a private bucket with server-side file validation.
- Deployed to production on Vercel from a public GitHub repository on free tiers, backed by a seeded Supabase database and a demo admin account.

Next.js · React · TypeScript · Tailwind · Supabase · Vercel · [luisa-and-son.vercel.app](#)

Jet — Architecture Portfolio · Personal Project 2026

- Built and shipped a phone-first portfolio site for architect Julianne Brigitte G. Sunga-Reyes, replacing a 30-page Issuu flipbook that carried no contact details and could not be indexed, filtered, or read outside Issuu's reader.
- Built the public site end to end: a home page, a projects index with category filters, project detail pages, an about page, and a resume.
- Modelled her body of work in Supabase — 5 categories, 21 projects, and 43 images in Storage — behind a schema with row-level security on every table.
- Cut the site imagery out of the 30 composed source sheets with a manifest-driven build script, so every drawing and render is her own work and no baked-in template copy ever publishes.

Next.js · React · TypeScript · Tailwind · Supabase · Vercel · [jet-portfolio-hazel.vercel.app](#)

GroundingMat — AI-Generated Video Ad · AI Video Production 2026

- Produced a full AI-generated, photorealistic video ad for The Grounding Co's grounding sheet, aimed at perimenopause-related sleep issues.

- Generated the clips in Gemini Flow, produced the voiceover in ElevenLabs, and cut the sequence in CapCut with burned-in captions matching the voiceover, an offer card, and a CTA.
- Delivered the ad in a scripted mechanism format — hook, mechanism breakdown, turn, reveal, and CTA — with no filmed footage at any point.

WORK EXPERIENCE

Graphic Artist — Luisa and Sons (Cake Shop) Jun 2026 – Present

- Design and produce custom cake toppers and cake graphics to client specifications.
- Manage multiple design jobs under strict production deadlines while maintaining print quality.
- Prepare production-ready artwork and coordinate with the team to keep daily output on schedule.

Business & Client Relations Associate — Cebuana Lhuillier Nov 2023 – Jun 2024

- Managed high-volume client transactions while ensuring accuracy, compliance, and professional service delivery.
- Built strong customer relationships through proactive communication and effective service resolution.
- Addressed and resolved customer concerns quickly to maintain high satisfaction and protect brand reputation.
- Supported daily branch operations by coordinating with team members to keep service workflows efficient.

Administrative Assistant — Church by the Highway Sep 2022 – Oct 2023

- Handled administrative and clerical tasks, including documentation, filing, and record-keeping.
- Coordinated schedules, communications, and office logistics to support daily operations.
- Assisted staff and volunteers with documentation and general office needs.

Layout Artist & Printer Specialist — Cong Clothing Jul 2020 – Aug 2021

- Designed and finalized production-ready sticker layouts ensuring accuracy and print quality.
- Collaborated with clients and internal teams to refine artwork and meet project specifications.
- Managed multiple design projects simultaneously while maintaining strict production deadlines.
- Improved workflow efficiency by applying design best practices and preparing optimized print files.

IT Support — Neo Concept Advertising and Events May 2018 – Dec 2019

- Provided technical support for staff and operations, including hardware and software troubleshooting.
- Installed, configured, and maintained computer systems to support reliable day-to-day operations.
- Diagnosed and resolved system issues quickly to minimize downtime during business activities and events.
- Monitored system performance and assisted with upgrades to improve operational stability.

CORE COMPETENCIES & KEY SKILLS

AI & Automation	ChatGPT & Claude for Business Tasks · Gemini & opencode · AI Research & Summarization · AI-Assisted Email & Document Drafting · Prompt Writing & Prompt Engineering · Workflow Automation Concepts · Content Repurposing · Automated Data Entry & Cleanup · n8n Automation · Systems & Automation Building
Administrative	Data Entry & Data Encoding · Document Preparation & Reporting · Email & Inbox Management · Spreadsheet Management · Database Maintenance & Cleanup · File & Folder Organization · Calendar & Appointment Scheduling · Order & Transaction Processing · Records Management & Accuracy Checking · Administrative Support
Design	Adobe Photoshop · Adobe Illustrator · Canva · Layout & Print Production

Professional

Client Relations · Customer Service · Operations Coordination · IT Troubleshooting · Problem Solving · Multitasking

EDUCATION

Philippine Women's University — Bachelor of Science in Information Technology

2015
